Subject index

Amino acids: radiolabelling; substantivity; hydrolysed protein; penetration; 215
Amphoteric: cationic; ecology; risk assessment; biodegradation; ecotoxicity; surfactants; cosmetics; anionic; nonionic; 227
Analysis: sweat reduction; titanium; antiperspirant; 271
Anionic: nonionic; amphoteric; cationic; ecology; risk assessment; biodegradation; ecotoxicity; surfactants; cosmetics; 227
Anodic silver: preservation; cosmetic dispersions; 27
Anti-oxidative activity: free radical scavenging activity; plant extracts; 299
Anti-wrinkle: skin smoothing; laser profilometry; Dead Sea minerals, ions; 105
Antiperspirant: analysis; sweat reduction; titanium; 271
Association structures: fragrances; emulsions; evaporation; phase equilibria; liquid crystals; detergents; 259
Atopic dermatitis: healthy skin; lipid extraction; ceramide/phospholipid-mixture; barrier function; 143

Barrier function: atopic dermatitis; healthy skin; lipid extraction; ceramide/phospholipid-mixture; 143
Biodegredation: ecotoxicity; surfactants; cosmetics; anionic; nonionic; amphoteric; cationic; ecology; risk assessment; 227
Block copolymers: emulsions; colloid stability; neutron scattering; 157

Cationic: ecology; risk assessment; biodegradation; ecotoxicity; surfactants; cosmetics; anionic; nonionic; amphoteric; 227
Ceramide/phospholipid-mixture: barrier function; atopic dermatitis; healthy skin; lipid extraction; 143
Ceramide: TEWL; stripping; skin repair; sodium lauryl sulfate; 15
Cocamidopropyl betaine: sodium cocoamphoacetate; disodium cocoamphoacetate; 239
Colloid stability: neutron scattering; block copolymers; emulsions; 157
Copolymer: silicone; emulsion; rheology; siloxane; 173
Cosmetic dispersions: anodic silver; preservation; 27
Cosmetics: anionic; nonionic; amphoteric; cationic; ecology; risk assessment; biodegradation; cotoxicity; surfactants; 227
Crystal distribution: physical sunscreens; ultrafine titanium dioxide; zinc oxide; 119
Cysteic acid: human hair; FTIR; data processing procedures; 1

Dandruff: ketoconazole; *Malassezia ovalis*; sebum; oily skin; 111
Data processing procedures: cysteic acid; human hair; FTIR; 1
Dead Sea minerals: ions; anti-wrinkle; skin smoothing; laser profilometry; 105
Detergents: association structures; fragrances; emulsions; evaporation; phase equilibria; liquid crystals; 259
Direct dyes: hair colouring cosmetics; HPLC determination; 51
Disodium cocamphoacetate: cocoamidopropyl; sodium cocoamphoacetate; 239
DOPA auto-oxidation: plant extracts; tyrosinase inhibition; 291

Ecology: risk assessment; biodegradation; ecotoxicity; surfactants; cosmetics; anionic; nonionic; amphoteric; cationic; 227
Ecotoxicity: surfactants; cosmetics; anionic; nonionic; amphoteric; cationic; ecology; risk assessment; biodegradation; 227
Emulsion type: photochemical behaviour; stripping method; UV filters; 87
Emulsion: rheology; siloxane; copolymer; silicone; 173
Emulsions: colloid stability; neutron scattering; block copolymers; 157
Emulsions: evaporation; phase equilibria; liquid crystals; detergents; association structures; fragrances; 259

0142–5463 © 1997 *International Journal of Cosmetic Science*

Emulsions: liquid crystals; vapour pressure; fragrances; microemulsions; 75
Ethylene glycol(di)stearate: pearlizing agents; pearlescence; 205
Evaporation: phase equilibria; liquid crystals; detergents; association structures; fragrances; emulsions; 259
Ex vivo: moisturizing; infrared; urea; pig skin; 37

Fibre array model: hair shine; gloss; 131
Fragrances: emulsions; evaporation; phase equilibria; liquid crystals; detergents; association structures; 259
Fragrances: microemulsions; emulsions; liquid crystals; vapour pressure; 75
Free radical scavenging activity: plant extracts; anti-oxidative activity; 299
FTIR: data processing procedures; cysteic acid; human hair; 1

Gelatin cells: occlusive films; multiple emulsions; O/W/O emulsions; skin hydration; 65
Gloss: fibre array model; hair shine; 131

Hair colouring cosmetics: HPLC determination; direct dyes; 51
Hair shine: gloss; fibre array model; 131
Hazard assessment: risk assessment; quantitative structure activity relationships (QSAR); *in vitro* techniques; preservatives; 281
Healthy skin: lipid extraction; ceramide/phospholipid-mixture; barrier function; atopic dermatitis; 143
HPLC determination: direct dyes; hair colouring cosmetics; 51
Human hair: FTIR; data processing procedures; cysteic acid; 1
Hydrolysed protein: penetration; amino acids; radiolabelling; substantivity; 215

***In vitro* techniques:** preservatives; hazard assessment; risk assessment; quantitative structure activity relationships (QSAR); 281
***In vivo* SPF:** rheological tests; titanium dioxide; zinc oxide; sunscreens; ultrafine metal oxides; 193
Infrared: urea; pig skin; *ex vivo*; moisturizing; 37
Ions: anti-wrinkle; skin smoothing; laser profilometry; Dead Sea minerals; 105

Ketoconazole: *Malassezia ovalis*; sebum; oily skin; dandruff; 111

Laser profilometry: Dead Sea minerals; ions; anti-wrinkle; skin smoothing; 105
Lipid extraction: ceramide/phospholipid-mixture; barrier function; atopic dermatitis; healthy skin; 143
Liquid crystals: detergents; association structures; fragrances; emulsions; evaporation; phase equilibria; 259
Liquid crystals: vapour pressure; fragrances; microemulsions; emulsions; 75

***Malassezia ovalis*:** sebum; oily skin; dandruff; ketoconazole; 111
Metal ion: skin; titanium; zinc; UV-light; 167
Microemulsions: emulsions; liquid crystals; vapour pressure; fragrances; 75
Moisturizing: infrared; urea; pig skin; *ex vivo*; 37
Multiple emulsions: O/W/O emulsions; skin hydration; gelatin cells; occlusive films; 65

Neutron scattering: block copolymers; emulsions; colloid stability; 157
Nonionic: amphoteric; cationic; ecology; risk assessment; biodegradation; ecotoxicity; surfactants; cosmetics; anionic; 227

O/W/O emulsions: skin hydration; gelatin cells; occlusive films; multiple emulsions; 65
Occlusive films: multiple emulsions; O/W/O emulsions; skin hydration; gelatin cells; 65
Oily skin: dandruff; ketoconazole; *Malassezia ovalis*; sebum; 111

Pearlescence: ethylene glycol(di)stearate; pearlizing agents; 205
Pearlizing agents: pearlescence; ethylene glycol(di)stearate; 205
Penetration: amino acids; radiolabelling; substantivity; hydrolysed protein; 215
Phase equilibria: liquid crystals; detergents; association structures; fragrances; emulsions; evaporation; 259
Photochemical behaviour: stripping method; UV filters; emulsion type; 87
Physical sunscreens: ultrafine titanium dioxide; zinc oxide; crystal distribution; 119
Pig skin: *ex vivo*; moisturizing; infrared; urea; 37

Plant extracts: anti-oxidative activity; free radical scavenging activity; 299
Plant extracts: tyrosinase inhibition; DOPA auto-oxidation; 291
Preservation: cosmetic dispersions; anodic silver; 27
Preservatives: hazard assessment; risk assessment; quantitative structure activity relationships (QSAR); *in vitro* techniques; 281

Quantitative structure activity relationships (QSAR): *in vitro* techniques; preservatives; hazard assessment; risk assessment; 281

Radiolabelling: substantivity; hydrolysed protein; penetration; amino acids; 215
Rheological tests: titanium dioxide; zinc oxide; sunscreens; ultrafine metal oxides; *in vivo* SPF; 193
Rheology: siloxane; copolymer; silicone; emulsion; 173
Risk assessment: biodegradation; ecotoxicity; surfactants; cosmetics; anionic; nonionic; amphoteric; cationic; ecology; 227
Risk assessment: quantitative structure activity relationships (QSAR); *in vitro* techniques; preservatives; hazard assessment; 281

Sebum: oily skin; dandruff; ketoconazole; *Malassezia ovalis*; 111
Silicone: emulsion; rheology; siloxane; copolymer; 173
Siloxane: copolymer; silicone; emulsion; rheology; 173
Skin hydration: geletin cells; occlusive films; multiple emulsions; O/W/O emulsions; 65
Skin repair: sodium lauryl sulfate; ceramide; TEWL; stripping; 15
Skin smoothing: laser profilometry; Dead Sea minerals; ions; anti-wrinkle; 105
Skin: titanium; zinc; UV-light; metal ion; 167
Sodium cocoamphoacetate: disodium cocamphoacetate; cocamidopropyl; 239
Sodium lauryl sulfate: ceramide; TEWL; stripping; skin repair; 15
Stripping method: UV filters; emulsion type; photochemical behaviour; 87
Stripping: skin repair; sodium lauryl sulfate; ceramide; TEWL; 15
Substantivity: hydrolysed protein; penetration; amino acids; radiolabelling; 215
Surfactants: cosmetics; anionic; nonionic; amphoteric; cationic; ecology; risk assessment; biodegradation; ecotoxicity; 227
Sunscreens: ultrafine metal oxides; *in vivo* SPF; rheological tests; titanium dioxide; zinc oxide; 193
Sweat reduction: titanium; antiperspirant; analysis; 271

TEWL: stripping; skin repair; sodium lauryl sulfate; ceramide; 15
Titanium dioxide: zinc oxide; sunscreens; ultrafine metal oxides; *in vivo* SPF; rheological tests; 193
Titanium: antiperspirant; analysis; sweat reduction; 271
Titanium: zinc; UV-light; metal ion; skin; 167
Tyrosinase inhibition: DOPA auto-oxidation; plant extracts; 291

Ultrafine metal oxides: *in vivo* SPF; rheological tests; titanium dioxide; zinc oxide; sunscreens; 193
Ultrafine titanium dioxide: zinc oxide; crystal distribution; physical sunscreens; 119
Urea: pid skin; *ex vivo*; moisturizing; infrared; 37
UV filters: emulsion type; photochemical behaviour; stripping method; 87
UV-light: metal ion; skin; titanium; zinc; 167

Vapour pressure: fragrances; microemulsions; emulsions; liquid crystals; 75

Zinc oxide: sunscreens; ultrafine metal oxides; *in vivo* SPF; rhelogical tests; titanium dioxide; 193
Zinc oxide: crystal distribution; physical sunscreens; ultrafine titanium dioxide; 119
Zinc: UV-light; metal ion; skin; titanium; 167
